PROJECTS

Full-Stack React Social Media Application

https://github.com/dugan-jo/Full-Stack-Social-Media-Application
https://friender-social-media.herokuapp.com/

React - HTML/CSS - MongoDB - ExpressJS - Apollo Cloud Server - Mongoose - FakerJS

Built a full-stack social media application using the MERN stack.

- Experience with MERN stack development (MongoDB, Express, React and Node)
- Experience in ReactJS framework and knowledge in developing single-page applications (SPA).
- Familiar with creating custom reusable React Components.

Full-Stack Handlebars Project Management Application

https://github.com/dugan-jo/Full-Stack-Project-Management-Application
http://hidden-forest-18193.herokuapp.com/

Handlebars - HTML/CSS - JavaScript - ExpressJS - MySQL Workbench - Insomnia - Bootstrap

Designed and built a full-stack Project Management Application using the MVC paradigm, created a server-side API, user authentication and connected Database.

- Good understanding on customizing CSS framework like bootstrap and MUI
- Experience with front-end development with back-end system integration and maintenance

Front-End Music Application

https://github.com/dugan-jo/Front-End-Music-App
https://dugan-jo.github.io/Front-End-Music-App/

ShazamAPI - YouTubeAPI - HTML/CSS - JavaScript - Query - iFrame - Bootstrap

Conceived and executed a front-end music application by integrating data received from multiple server-side API requests.

- Experience working with third party web service API's (REST) and Web Services using JQuery
- Experience in Object Oriented Concepts and JavaScript Programming
- Knowledge of Responsive Web Design, checking for mobile compatibility.
- Good Understanding of Document Object Model (DOM) and DOM compatibility.
- Implemented easy to use Bootstrap buttons, forms and carousel.

LANGUAGES & TOOLS

JavaScript, HTML, CSS, NodeJS, JQuery, API's, MySQL, MongoDB, Handlebars, React, GraphQL, Regex, bCrypt, ExpressJS, OOP, JSON Web Tokens

APPLICATIONS

Visual Studio, GitHub, Mongo, Compass, Insomnia, Heroku, MySQL Workbench, Slack, Docker

APPLICATIONS

Visual Studio, GitHub, Mongo, Compass, Insomnia, Heroku, MySQL Workbench, Slack, Docker

Populous, Project Manager

August 2018 - April 2021

- Lead designer for the NCAA Men's Final four.
- Created simple Revit scripts that increased productivity by 50% that decreased onsite delivery and build out time.
- Coordinated 50+ departments such as contractors, structural engineers, broadcast and media, law enforcement and city, state and federal regulatory departments

Venture Architecture, Project Manager

May 2014 - March 2017

- Provided elegant and efficient design solutions.
- Work under indirect supervision. Effective interpersonal skills and collaborative management style to include teamwork and team building ability.
- Comfortable with ambiguity and time spent outside of comfort zone acquiring new skills
- Technically creative and open-minded.

EDUCATION

Full Stack Web Developer , University of Denver
January 2022 - April 2022

MArch, Architecture, Ecole Nationale d'Architecture
August 2011 - May 2013

BArch, Architecture, University of Houston
August 2005 - May 2011

PERSONAL STATEMENT

Full-stack web developer leveraging an architecture and design background to build a more intuitive and user centric experience on the web. Recently earned certificate in full stack development from the University of Denver (DU) Coding Boot Camp. I honed in on my creative side and emphasized my focus on front-end design, which sparked a passion for the composition of what the user sees . I have developed new skills in JavaScript, CSS, JQuery, React, and responsive web design.
